J04 / JOURNAL PREPARATION

Post, verify or correct a journal

Bookkeeping / Journal / Active Journal

Post only after each currency, the LAK reporting amount and the economic purpose agree.

01 **Review the draft**

Check the period, evidence, totals by currency, account ownership and line memos. For foreign entries, inspect the LAK counterparts. Review staff-clearing, statutory and technical balances affected by the entry.

02 **Post once**

Use Post and wait for confirmation. Record the assigned ID. Ordinary journals use the normal OJM sequence. Keep payroll run references, document numbers, AMO and REC series distinct.

03 **Verify the receipt**

Open the saved entry and trace it into the relevant ledger or report. If a device shows pending confirmation, resolve the original request. For a batch, identify which items posted before retrying any remainder.

04 **Correct with a trail**

In an open book, use the authorized edit or void workflow and record the reason. For a closed book, use the correction process and retain the link to the original. Keep the original evidence, approval and before/after amounts.

Duplicate check

Two equal purchases on the same day can both be valid. Compare supplier, receipt number, custodian and line details before deciding whether one is a duplicate.

Before you finish

Never fill an older numbering gap by hand. Use the ID assigned by the app after confirmation.
