O07 / OPERATING ENTRIES

# Link vouchers, cash slips and budget records

Bookkeeping / Journal / Documents or Budget

*Connect the journal with its supporting documents while keeping each document's identifier and purpose.*

01 **Prepare the support**

Use a receipt or voucher for the transaction and keep the reference, purpose, original amount and signatories. Scan readable pages in order and link the finalized file to the correct journal.

02 **Use the monthly cash slip**

Fill in number, day, initials, description, source, debit or credit, and both signatures. Complete the month/year and initials legend. Use Signature 1 and Signature 2 for the two people involved in either direction.

03 **Prepare the budget record**

Separate the request month from dates of actual funding, expenses, exchanges, advances and repayments. Compare actual spending by category and retain receipts. Confirm any remaining balance.

04 **Connect the records**

A printed voucher or finalized utilization report supports a transaction. Prepare and post the associated journal explicitly, then cross-reference the confirmed journal ID and the document.

**Reference example**

A December budget request approved in November funds a January purchase. Keep the budget month on the request and the actual payment date, receipt and journal reference on the utilization line.

**Before you finish**

A document number identifies the document. Match it to the confirmed journal ID before treating the transaction as posted.
